

Riverport Industrial Park Designated as AT&T Fiber Ready

Designation Reflects Presence of Fiber-Based, High-Speed Internet

LOUISVILLE, KY., March 26, 2018 — AT&T* is continuing efforts to drive economic development and investment in Kentucky. AT&T and local officials today announced that the Louisville & Jefferson County Riverport Authority, more commonly known as Riverport Industrial Park, has been designated AT&T Fiber Ready.

The AT&T Fiber Ready designation helps economic development leaders more effectively position their communities for site selection by emphasizing the availability of high-speed, fiber-based services.

In today's world, connectivity is vital to new employers and businesses of every type.

"It is always encouraging when the business community comes alongside local leadership and provides a resource like this designation to highlight what our community brings to the table, when companies are making the important decisions on where they have the best chance to succeed," said Mayor Greg Fischer. "Our community has many wonderful aspects to attract businesses looking to locate or move, and having the 'Fiber Ready' designation is a key tool in the toolbox to emphasize that we are ready to face the challenges of a modern economy."

"The AT&T Fiber Ready designation provides a clear stamp to tell the business community that we have the fiber-optic infrastructure in place to meet the needs of businesses," said Kent Oyler, president & CEO, Greater Louisville Inc. "I am grateful for the leadership of our elected officials here in the city and in our state legislature who have created a more positive, pro-investment environment in the Commonwealth."

AT&T has been deploying high-speed, fiber-optic infrastructure across Kentucky for years, totaling nearly 980,000 strand miles of fiber-optics to date, and the AT&T Fiber Ready designation is a tool for economic development leaders to highlight the assets available in their facilities.

"For years, AT&T has invested in Kentucky to deliver high-speed Internet in urban and rural areas all across the Commonwealth using the latest wired and wireless technologies, and this announcement offers an opportunity to highlight AT&T's fiber infrastructure in the Riverport Industrial Park – infrastructure that is helping local businesses drive job creation," said Hood Harris, president, AT&T Kentucky. "AT&T Kentucky's employees are working hard every day to deploy our fiber-based network that delivers the high-speed Internet access that Kentuckians want and need, and the fiber optic connectivity that is available in the Riverport Industrial Park is in place to meet the communications needs of businesses of all sizes."
